

Focus on Food Safety

Guidelines for Basic Labeling Requirements

Every food in Package Form must bear the following information on its labeling:

- 1) The common and usual name of the product.
- 2) The name and address of the Manufacturer or Distributor.
- 3) The net weight.
- 4) A list of ingredients in the order of their preponderance

Information required by law must be printed in type of sufficient size and prominence to be easily read under the normal conditions of sale and display. This information should be printed on the main part of the label in a color which contrasts with its background. This information must be in English.

The term “Package” means any commodity put up or packaged in any manner in advance of sale in units suitable for either wholesale or retail sale.
